PROFESSIONAL SUMMARY

Software Developer with experience in **backend development, REST APIs, database integration**, and workflow automation. Hands-on experience with **Python, and AWS services**, Java, Spring Boot, through professional work and personal projects. Interested in solving practical engineering problems and building **secure, reliable and maintainable software**.

PROFESSIONAL EXPERIENCE

COFORGE | Jan 2026 – Present
Graduate Engineer Trainee | Client: TriNet | [August 2026]
SBC Extraction AI Agent

- Working on **AI-based document extraction system** for processing carrier-provided **Summary Of Benefits and Coverage (SBC) PDFs** and extracting structured insurance-plan information
- Gained hands-on understanding of the workflow involving **AWS S3, AWS Lambda, Amazon Bedrock, and LLM-based document processing**
- Working with **structured JSON and Markdown outputs generated** from the extracted **SBC information** for **downstream consumption**.

Carrier Contact Chart Automation

- Worked with an internal **automation solution** to generate the **Carrier And Benefits Contact information** extraction and PDF generation, replacing a **previously manual workflow**.
- **Reverse-engineered** the existing database architecture and data flow to identify relevant data sources and implement a new **REST API** to retrieve required information.
- Worked with **Java, Spring Boot, MySQL** for data retrieval, backend integration, and PDF generation using **Thymeleaf**, and **OpenHTMLtoPDF**.

Graduate Engineer Trainee | Internship | Jan 2026 – Jul 2026

- Completed training in **Java, Spring Boot, backend development, and python fundamentals**.
- Worked on practical development tasks to build hands-on understanding of **backend application development and software engineering**.
- Gained experience working with **development tools**, **APIs, databases, and application workflows**.

PROJECTS

JourneyForge (LiveDemo)
Tech Stack: React, Gemini API, FireBase

- Built a travel planning web app using **React and Gemini API** to provide smart recommendations for destinations, stays, and activities.
- Enabled **personalized itinerary generation** based on user preferences, budget, and travel style.
- Integrated **real-time data** for prices, availability, and travel insight to enhance decision-making.
- Designed an **interactive and responsive UI** for seamless user experience across devices.
- Focused on enhancing travel planning with AI-driven suggestions and intelligent routing.

LangChain RAG Chatbot
Tech Stack: Python, FastAPI, LangChain, Qdrant

- Built a **Retrieval-Augmented Generation(RAG)** application using **FastAPI and LangChain** for document-based questions.
- Implemented document **chunking using LangChain's Recursive Character Text Splitter**, generated **vector embeddings**, and stored them In **Qdrant vector database.**
- Developed **indexing and retrieval pipelines** to retrieve relevant chunks and provide context for generating responses.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, HTML, CSS
Backend & Frameworks: FastAPI , LangChain, LangGraph, Spring Boot, REST APIs, React.js,
Cloud & Tools: AWS S3, AWS Lambda, Amazon Bedrock, Git, GitHub, Insomnia, Docker, Kubernetes, Linux
Databases: MySQL, Postgres, Oracle, Qdrant
Core CS: Data Structures And Algorithms, DBMS, Operating System

EDUCATION

Pranveer Singh Institute of Technology | B.Tech, Computer Science | 76.5%

CERTIFICATIONS & ACHIEVEMENTS

- Solved 200+ problems on Leetcode.
- Achieved a 5-star rating in problem-solving on **HackerRank.**
- **Certifications:** Java OOP, DBMS, and Python Fundamentals - **Infosys Springboard**
- **Certifications:** Full Stack **generative and Agentic AI with Python** – **Udemy Certificate**
